

# Separated amplifier type Laser sensor

## LDA SERIES CE

**High performance with easy handling!**  
**Possible to detect transparent object!**

- Visible laser ray!
- High response time, 60  $\mu$  sec (when Fast mode).
- 3 kinds of beam can be chosen [Spot (standard), area, line] (only retro-reflection type with coaxial).
- IP67 for sensor head.
- Sensitivity correcting function is provided.
- Coaxial-reflection type is also lined-up.

### Applications

**Through-beam type** [Warp detection]

**Coaxial retro-reflection type**  
[Transparent detection]

**Coaxial reflection type** [Tip work detection]

**Through-beam, length measurement type**  
[Height/width detection]

**Coaxial retro-reflection type, long distance**  
[Uneven goods detection]

### Teaching mode

It is easy to set each teaching mode in accordance with the application.

#### Transparent objects teaching

This mode is to detect transparent objects with retro-reflection type sensor head. (Glass or plastic film etc.) It is possible to detect objects with flat light-receiving amount like a transparent object by one point teaching under no object.

#### Zone teaching

This teaching is to detect within upper/lower limit value. It is possible to set with  $\pm 10\%$  of light-receiving amount when teaching.

### One point teaching

It is possible to set not to detect background by teaching under no objects.

● **Reflection type**

Possible to set max. sensitivity under no objects

● **Through-beam/retro-reflection type**

Possible to set max. sensitivity under existing objects

### Auto teaching

It is possible to set suitable sensitivity even if objects are moving.

### Two points teaching

First, it makes 2 kinds of teaching for existing objects and no objects and it set threshold at the center between 2 points. It is suitable for the detection under severe condition such as the detection of very small object or step detection.

● **Reflection type**

### Length measuring teaching

It is possible to distinguish by teaching of width in the area. If exceeding +10%, output 1 operates and if exceeding -10%, output 2 operates.

## Specifications

### Sensor head

Kinds	Through-beam type	Length measurement	Coaxial retro-reflection	Coaxial retro-reflection (long type)	Coaxial reflection
Appearance					
Model No.	<b>JDA-15K5</b> Projector: JDA-15K5P Receiver: JDA-15K5R	<b>JDA-15K5-W</b> Projector: JDA-15K5-WP Receiver: JDA-15K5-WR	<b>HDA-70K3</b>	<b>HDA-350K3</b>	<b>HDA-08K1</b>
Optical system			Coaxial reflection		
Light source	Visible red semiconductor laser 650nm				
Laser class	JIS/IEC class1		JIS/IEC class2		
Max.power	390 μW		3mW		
Laser life	Approx.45,000 hours (at 55°C)				
Detecting distance	Long	1.5m (0.5 when length measurement mode*1)	0.08m~7m*2	0.5~35m*2	0.8m*3
	Standard		0.05m~4m*2	0.3~25m*2	0.6m*3
	Fast		0.02m~2m*2	0.1m~14m*2	0.2m*3
Spot diameter	φ 2 mm (at 1.5m)	30×2.5 mm (at 1.5m)	φ 9mm (at 7m)*4	φ 45mm (at 35m)	φ 1.3mm (at 0.8m)
Repeatability	0.2mm	0.3mm	0.2mm	0.2mm	0.2mm
Indication lamps	Laser emitting lamp (only projector): green LED, Output lamp (only receiver): orange LED		Laser emitting lamp: green LED, Output lamp: orange LED		
Connection	Connector type				
Ambient illuminance	Incandescent lamp: 3,000lux or less, sun light: 10,000lux or less				
Ambient temperature/humidity	-10 to +55°C (-20 to +60°C at stored), 35 to 85%RH (35 to 95% at stored) Not icing, not condensing				
Withstand voltage	1,000VAC/min.				
Vibration resistance	Double amplitude 1.5mm, 10 to 55Hz, each 2 hour in X, Y and Z directions				
Impact resistance	500m/s <sup>2</sup> , each 3 time in X, Y and Z directions				
Protective structure	IP67 (IEC standard)				
Case materials	Case: polycarbonate, window: glass, PMMA resin				

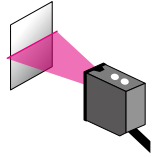

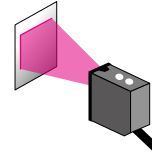

<b>Weight (including cable)</b>	Approx.90g	Approx.115g	Approx.45g		
<b>Accessory</b>			Reflector (RRL-23S)	Reflector (RRL-51S)	

- \*1. Setting of the response time when measuring mode is available only under Long mode or standard mode.
- \*2. The attached reflector is used.
- \*3. The detecting object is a white paper with 200×200mm.
- \*4. Spot diameter can be changed with the attachment as an option.

**Amplifier**

Model No.	LDA-DC	LDA-DA
<b>Power source</b>	12 to 24VDC (+10%, -10%, ripple 10% or less)	
<b>Current consumption</b>	45mA when 24VDC (including sensor head but excluding analog output current)	
<b>Response speed (sensing mode)</b>	60 μs/500 μs/2ms (Fast/Standard/Long depending on the sensing mode)	
<b>Output</b>	NPN open-collector output	PNP open-collector output
<b>Control output</b>	100mA 24VDC or less (Residual voltage 1.8V or less)	
<b>Indication lamps</b>	Laser emission lamp: Green, output lamp: orange, teaching lamp: red, channel lamp: green (1/2CH)	
<b>Digital indicators</b>	7-segment LED, 8 digits	
<b>Timer function</b>	ON-delay, OFF-delay, one-shot	
<b>Timer time</b>	1msec to 9sec	
<b>Teaching</b>	1-point, 2-point, zone, transparent detection, length measuring	
<b>Operating mode</b>	Changeover switch (L: Light-ON, D: Dark-ON)	
<b>Analog output</b>	4 to 20mA	
<b>Input/output setting</b>	Outer input setting:1-point teaching, synchronous input, laser OFF, counter reset Output setting:2CH output + alarm setting	
<b>Zero reset</b>	Provided	
<b>Initial reset</b>	Provided (Mode is returned to initial setting)	
<b>Connection</b>	Cable 2m long	
<b>Ambient temperature/humidity</b>	-25 to +55°C (-20 to +60°C at stored), 35 to 85%RH (35 to 95% at stored) Not icing, not condensing	
<b>Withstand voltage</b>	1,000VAC/min.	
<b>Insulation resistance</b>	20MΩ (500VDC) or more	
<b>Vibration resistance</b>	Double amplitude 1.5mm, 10 to 55Hz, each 2 hour in X, Y and Z directions	
<b>Impact resistance</b>	500m/s <sup>2</sup> , each 3 time in X, Y and Z directions	
<b>Protective structure</b>	IP50 (IEC standard)	
<b>Case material</b>	Body/cover: Polycarbonate	
<b>Weight</b>	Approx.65g (including cable)	
<b>Accessory</b>	Fitting metal	
<b>Mounting</b>	DIN rail mounting	

**Lens attachment (as an option)**

Appearance	Model No.	Spot diameter	Remark
	<b>FPL-A01</b>	<div style="display: flex; justify-content: space-around;"> <div style="text-align: center;"> <p>Line type 40×1mm (at 300mm)</p>  </div> <div style="text-align: center;"> <p>Area type 35×35mm (at 300mm)</p>  </div> </div>	Spot diameter can be changed with exclusive lens attachment.

**■ Cautions for Laser Product**

This product is radiating the infrared laser beam and is classified as Class 1/2 by JIS C6802:2005/IEC 60825-1 Laser Safety Standard. Refer to Page 159.

**Warning**

Don't view the laser beam directly or expose it to human eyes. It may injure human eyes or damage health.

**through-beam type**

**Length measurement**

**Coaxial retro-reflection**

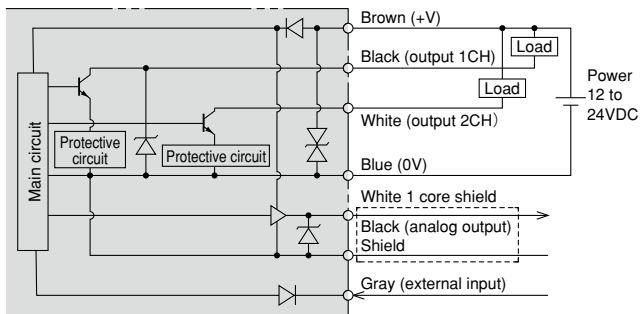

**Coaxial retro-reflection (long type)**

**Coaxial reflection**
